Product Requirements Document — "Iltiam" (التيئام) *(working name)*

Field	Value
Document status	Draft v1.0 — ready for stakeholder review
Date	2026-10-15
Source	Grill Me discovery interview (35 questions, Arabic), conducted 2026-10-13 → 2026-10-15
Product type	Web application + installable PWA (multi-sided marketplace)
Launch market	Gaza Strip, Palestine
Interface language	Arabic (RTL); medicine names in Arabic **and** English

How to read this document

Every requirement and rule carries a source tag:

Tag	Meaning
[C]	**Confirmed** — explicitly answered by the product owner during the interview.
[A]	**Assumption** — inferred by the PM/BA to make the requirement complete and testable. Must be validated (see §26).
[D]	**Delegated** — the product owner asked the PM to choose ("choose the best"). Treated as a recommendation, changeable without product impact.

Where the interview was re-started, the **latest answer prevails** (see §26.1 for superseded answers).

---

1. Product Overview

Iltiam (working name; final name is an open question) is a dermatology-focused care platform for patients in Gaza. It connects three parties in one journey:

1. **Patient → Dermatologist**: the patient browses verified dermatology clinics, then sends an asynchronous message (free or paid, as each doctor decides), books a scheduled live text consultation (paid), or books an in-person visit (paid at the clinic). [C]
2. **Dermatologist → Prescription**: after any service performed through the platform, the doctor issues an electronic prescription selected from a unified, admin-managed dermatology medicine catalog. [C]
3. **Prescription → "Saydaliyati" (صيدليتي, "My Pharmacy")**: the platform shows the patient the price and the nearest pharmacies that stock the prescribed medicines, the pharmacy confirms availability and price, the patient pays the pharmacy directly through a local e-wallet, and picks up the order with a pickup code. [C]

Unique value: the end-to-end bridge from diagnosis to medicine in hand — price transparency and availability before the patient leaves home, which matters greatly in Gaza's conditions of medicine shortages, displacement, and unreliable connectivity.

Business model: patients never pay the platform. Clinics and pharmacies get a free trial, then pay a monthly subscription. No patient money flows through the platform; payments go directly from patient to clinic/pharmacy wallets. [C]

---

2. Problem Statement

#	Problem	Who feels it
P1	Reaching a dermatologist requires physical travel, which is costly and risky in Gaza; many skin conditions could be triaged remotely from photos.	Patients
P2	After receiving a prescription, patients do not know which pharmacy has the medicine or what it costs, and must go from pharmacy to pharmacy. Shortages make this worse.	Patients
P3	Clinics lack a simple digital channel to receive remote consultations, manage appointments, and issue prescriptions.	Clinics, doctors
P4	Pharmacies lack a channel to receive confirmed, prepaid orders from patients with valid prescriptions.	Pharmacies

Note: The problem statements are derived from the product idea as stated by the owner. No user research or market data was provided [A]. Validating them is recommended (see §25).

---

3. Product Goals

ID	Goal	Type
G-1	Let a patient go from "skin concern" to "prescription" without leaving home, when clinically appropriate.	User
G-2	Let a patient know **before travelling** which nearby pharmacy has the prescribed medicines and at what price.	User
G-3	Give clinics a lightweight tool for remote consultations, scheduling, and e-prescribing.	Partner
G-4	Give pharmacies a flow for confirmed, prepaid orders.	Partner
G-5	Generate recurring revenue from clinic and pharmacy subscriptions after a free trial.	Business
G-6	Remain usable under unreliable power and internet (asynchronous-first design, lightweight pages).	Quality

Quantitative targets are **not defined yet** (§22, §26).

---

4. Non-Goals

Out of scope for the MVP. Some may come in later phases (§24).

ID	Non-goal	Source
NG-1	Video consultations.	[C] Deferred to Phase 2
NG-2	Booking of treatment sessions or packages (laser, peeling, and so on).	[C] Deferred to Phase 2
NG-3	Non-dermatology specialties or medicines.	[C]

ID	Non-goal	Source
NG-4	Processing, holding, or splitting patient payments on the platform (no escrow, no commission collection).	[C]
NG-5	Charging patients any fee.	[C]
NG-6	Payment proof by uploading a receipt image.	[C] Explicitly rejected
NG-7	Automated e-wallet API integration.	[C] Deferred to Phase 2
NG-8	Native iOS/Android store apps.	[C] Deferred to Phase 2
NG-9	Ratings and reviews of doctors or pharmacies.	[A] Deferred (owner undecided)
NG-10	Delivery of medicines (pickup only).	[A] Not discussed; pickup is the stated model
NG-11	Independent doctors without a physical clinic.	[C]
NG-12	English UI.	[C] Arabic UI only; medicine names bilingual
NG-13	WhatsApp or SMS notifications.	[A] Not selected for MVP
NG-14	Operation outside Gaza.	[C]

5. Target Users

User group	Description	Platform role(s)
Dermatology patients in Gaza	Adults (18+) who hold an account and may manage consultations for family members, including children.	Guest, Patient
Dermatologists	Licensed dermatology specialists, always attached to a physical clinic.	Doctor
Dermatology clinics	Clinics with one or more doctors. A private clinic is a one-doctor clinic.	Clinic Manager, Clinic Staff
Pharmacies in Gaza	Licensed pharmacies that sell dermatology medicines.	Pharmacy
Platform operator	Internal team that verifies partners and manages the catalog and subscriptions.	Platform Admin

6. User Personas

Personas are illustrative [A], built from the interview context.

Persona	Context	Goals	Frustrations
Sara, 29, patient	Displaced within Gaza, mobile phone only, intermittent internet. Has acne flare-ups.	Get a doctor's opinion from photos; know where her medicine is and its price before walking there.	Long trips to clinics; pharmacies that don't have the medicine.
Abu Khaled, 45, parent	Manages care for his wife and 3 children from one phone.	Book for his child under his own account; keep each family member's history separate.	Separate accounts and paperwork for each family member.

Persona	Context	Goals	Frustrations
Dr. Ahmad, dermatologist	Runs a one-doctor private clinic with a secretary.	Answer simple cases remotely; fill in-person slots; issue prescriptions quickly.	Unpaid "quick questions"; no-shows.
Lina, clinic secretary	Manages the clinic's schedule and payments.	Manage the doctor's calendar; confirm wallet payments quickly.	Must not see patients' medical photos or content.
Pharmacist Omar	Neighborhood pharmacy, busy counter, power cuts.	Receive confirmed orders; avoid holding stock for people who never come.	Keeping prices and stock updated; unpaid reservations.
Platform Admin (Nour)	Ops team member.	Verify licenses; manage the medicine catalog; track subscriptions.	Fake or unlicensed providers; duplicate medicine names.

7. User Needs

ID	Need	Persona
UN-1	Browse clinics and doctors without creating an account.	Patient
UN-2	Send a case with photos and get a response within a known time.	Patient
UN-3	Book a live chat or an in-person visit at a specific time.	Patient
UN-4	Manage family members' consultations from one account.	Parent
UN-5	See the price and nearest pharmacy with the prescribed medicines.	Patient
UN-6	Be sure the pharmacy really has the medicine before paying.	Patient
UN-7	Pick up the medicine at a convenient time, possibly through a relative.	Patient
UN-8	Decide whether async messages are free, paid, or disabled.	Doctor
UN-9	Delegate schedule and payment confirmation to staff without exposing medical data.	Doctor, Clinic
UN-10	Maintain prices and availability for a manageable (dermatology-only) list.	Pharmacy
UN-11	Ensure only licensed, physically located providers appear.	Admin, Patient
UN-12	Medical data visible only to the patient and the treating doctor.	Patient

8. User Stories

ID	As a...	I want to...	So that...	Feature
US-01	Guest	browse clinics, doctors, services, and prices without signing up	I can decide before committing	F-04
US-02	Guest	register with email and password when I book or consult	I can use services	F-03
US-03	Patient	add family members (e.g., my children) to my account	I can request care on their behalf	F-03

ID	As a…	I want to…	So that…	Feature
US-04	Patient	send an async message with text and photos to a doctor	I get an opinion without travelling	F-05
US-05	Patient	book a live text consultation slot and prepay	I get a real-time conversation at a set time	F-06
US-06	Patient	book an in-person appointment and pay at the clinic	I can be examined physically	F-07
US-07	Patient	pay via PalPay / Jawwal Pay / Bank of Palestine app and enter the transaction reference	the clinic or pharmacy can verify my payment	F-09
US-08	Patient	cancel a booking 24h+ in advance and get refunded	I'm not penalised for planning changes	F-15
US-09	Patient	see my prescription in Saydaliyati with nearest pharmacies and prices	I know where to get my medicines	F-12
US-10	Patient	split my prescription across pharmacies, or buy what's available now and the rest later	shortages don't block me	F-12
US-11	Patient	receive a pickup code and daily reminders	I (or a relative) can collect the order on time	F-14
US-12	Doctor	choose whether async messages are free, paid (my price), or disabled	I control my workload	F-05
US-13	Doctor	write an e-prescription from the catalog after a platform service	the patient can order it immediately	F-10
US-14	Doctor	add a free-text medicine not in the catalog and request it be added	I'm never blocked by catalog gaps	F-10, F-11
US-15	Doctor / Staff	manage availability for live chat and in-person slots	patients can book real free times	F-08
US-16	Doctor / Staff	confirm or reject a patient's payment reference	bookings only proceed when paid	F-09
US-17	Clinic Manager	register my clinic with documents and add doctors and staff	my clinic can operate on the platform	F-01
US-18	Pharmacy	register with documents	I can receive orders	F-02
US-19	Pharmacy	set daily prices and availability for catalog medicines	patients see accurate data	F-13
US-20	Pharmacy	accept or reject an order within 30 minutes	patients get a quick answer	F-13
US-21	Pharmacy	verify a pickup code and mark the order delivered	the right person gets the order	F-14
US-22	Admin	review and approve or reject clinics, doctors, and pharmacies	only verified providers appear	F-01, F-02, F-18
US-23	Admin	manage the unified dermatology medicine catalog (AR + EN)	names are consistent across doctors and pharmacies	F-11
US-24	Admin	record subscription payments and hide non-paying partners after a grace period	the business model is enforced	F-17

9. MVP Scope

9.1 In scope (MVP)

#	Capability	Source
1	Responsive web app installable as a PWA, with push notifications	[C]
2	Arabic RTL UI; bilingual (AR/EN) medicine names	[C]
3	Guest browsing of clinics, doctors, services, and prices	[C]
4	Patient registration and login with email and password	[C]
5	Family members under one adult account	[C]
6	Clinic self-registration, document upload, admin approval	[C]
7	Clinic Manager adds doctors (admin-approved) and staff	[C]
8	Pharmacy self-registration, document upload, admin approval	[C]
9	Async message consultation (free, paid, or disabled per doctor; 24h SLA; 72h follow-up window)	[C]
10	Booked live text consultation (prepaid; doctor-defined duration; 15-min wait rule)	[C]
11	In-person appointment booking (paid at clinic)	[C]
12	Schedule management by doctor or clinic staff	[C]
13	Manual payment verification: patient enters wallet transaction reference, provider confirms	[C]
14	E-prescription from unified dermatology catalog + free-text items + "add to catalog" request	[C]
15	Saydaliyati: GPS location (primary) or area selection (fallback); pharmacies by distance; price and last-updated	[C]
16	Partial availability: split across pharmacies, or buy available items and defer the rest	[C]
17	Pharmacy order confirmation within 30 min of working hours; auto-cancel otherwise	[C]
18	Pickup code (numeric + QR); pickup window set per pharmacy; daily reminders	[C]
19	Cancellation policy (24h rule) with manual refund marking	[C]
20	In-app notifications + PWA push	[C]
21	Medical data privacy (patient + treating doctor only)	[C]
22	Admin console: verification, catalog, subscriptions, partner visibility	[C]/[A]
23	Subscription status tracking: free trial → monthly; 7-day grace → hidden from new patients	[C]

9.2 Out of scope (MVP)

See §4 (Non-Goals) and §24 (Future Features).

---

10. Core Features

Each feature lists its Functional Requirements (§11), Business Rules (defined here), Edge Cases (§18), Error States (§19), and Acceptance Criteria (§23) by ID, so each item is defined in one place only.

Feature summary

ID	Feature	Priority
F-01	Clinic & Doctor Onboarding and Verification	Must Have
F-02	Pharmacy Onboarding and Verification	Must Have
F-03	Patient Account & Family Members	Must Have
F-04	Guest Browsing & Doctor Discovery	Must Have
F-05	Async Message Consultation	Must Have
F-06	Booked Live Text Consultation	Must Have
F-07	In-Person Appointment Booking	Must Have
F-08	Schedule Management	Must Have
F-09	Manual Payment Verification	Must Have
F-10	E-Prescription	Must Have
F-11	Unified Dermatology Medicine Catalog	Must Have
F-12	Saydaliyati — Pharmacy Search & Matching	Must Have
F-13	Pharmacy Inventory & Order Confirmation	Must Have
F-14	Order Pickup	Must Have
F-15	Cancellations & Refunds	Must Have
F-16	Notifications	Must Have
F-17	Partner Subscriptions	Should Have
F-18	Admin Console	Must Have

F-01 — Clinic & Doctor Onboarding and Verification

- **Purpose:** ensure only licensed dermatologists working from a real, physical clinic appear to patients.
- **User stories:** US-17, US-22
- **Functional requirements:** FR-001 – FR-009
- **Business rules:**

ID	Rule	Src
BR-001	Every doctor must belong to exactly one clinic that has a physical address. Independent doctors without a clinic are not allowed.	[C]
BR-002	A private clinic is registered as a clinic with one doctor.	[C]
BR-003	Clinic registration requires: a clinic license, a written address + map pin, and for each doctor a medical practice license and a dermatology specialty certificate.	[C]
BR-004	A clinic is invisible to patients until a Platform Admin approves it.	[C]
BR-005	Doctors added later by the Clinic Manager are invisible to patients until a Platform Admin approves their documents.	[C]
BR-006	A doctor belongs to only one clinic in the MVP.	[A]

ID	Rule	Src
BR-007	Rejection must include a reason visible to the applicant; the applicant may correct and resubmit.	[A]

- **Edge cases:** EC-01 – EC-04
- **Error states:** ERR-01, ERR-02, ERR-03
- **Acceptance criteria:** AC-01 – AC-05
- **Priority:** Must Have

F-02 — Pharmacy Onboarding and Verification

- **Purpose:** only licensed, physically located pharmacies receive orders.
- **User stories:** US-18, US-22
- **Functional requirements:** FR-010 – FR-013
- **Business rules:**

ID	Rule	Src
BR-010	Pharmacies onboard the same way as clinics: self-registration, document upload, admin approval.	[C]
BR-011	Required documents: pharmacy license, responsible pharmacist's license, written address + map pin.	[A] Derived from "same as clinics"
BR-012	A pharmacy must set its working hours, which are used for the 30-minute confirmation rule and to hide closed pharmacies.	[A] Required by BR-131
BR-013	Each pharmacy registers one or more e-wallet payment identifiers (PalPay / Jawwal Pay / Bank of Palestine) shown to patients at payment time.	[A]

- **Edge cases:** EC-05
- **Error states:** ERR-01, ERR-02
- **Acceptance criteria:** AC-06, AC-07
- **Priority:** Must Have

F-03 — Patient Account & Family Members

- **Purpose:** low-friction access, with one adult managing family care.
- **User stories:** US-02, US-03
- **Functional requirements:** FR-014 – FR-019
- **Business rules:**

ID	Rule	Src
BR-020	Browsing needs no account; an account is required to message, book, receive a prescription, or order medicine.	[C]
BR-021	Patients register with email + password.	[C]
BR-022	Account holders must be 18+. Minors are added as family members under the account holder.	[C]
BR-023	Each consultation, booking, and prescription is linked to one specific family member (the "patient of record").	[C]

ID	Rule	Src
BR-024	Email must be verified before the first paid or booked service.	[A]
BR-025	A mobile phone number is collected on the profile so clinics and pharmacies can contact the patient.	[A]

- **Edge cases:** EC-06, EC-07
- **Error states:** ERR-04, ERR-05
- **Acceptance criteria:** AC-08 – AC-10
- **Priority:** Must Have

F-04 — Guest Browsing & Doctor Discovery

- **Purpose:** let patients compare doctors and services before registering.
- **User stories:** US-01
- **Functional requirements:** FR-020 – FR-023
- **Business rules:**

ID	Rule	Src
BR-030	Only approved clinics and doctors with an active or trial (non-hidden) subscription are listed.	[C]
BR-031	Each doctor's listing shows the services they offer and their prices: async message (free / price / disabled), live chat (price, duration), in-person (price, paid at clinic).	[C]/[A]

- **Edge cases:** EC-08
- **Error states:** ERR-06
- **Acceptance criteria:** AC-11
- **Priority:** Must Have

F-05 — Async Message Consultation

- **Purpose:** remote triage that works without both parties being online at once, which matters given Gaza's power and internet conditions.
- **User stories:** US-04, US-12
- **Functional requirements:** FR-024 – FR-031
- **Business rules:**

ID	Rule	Src
BR-040	Each doctor sets async messaging to Free (default), Paid (doctor-defined price), or Disabled.	[C]
BR-041	The doctor must send a first response within 24 hours.	[C]
BR-042	Paid async: the 24h clock starts when the clinic confirms payment (F-09). Free async: it starts when the message is sent.	[A]
BR-043	If the doctor does not respond within 24h, the patient is notified and may consult another doctor. If the message was paid, the clinic must refund the patient.	[C]
BR-044	After the doctor's first response, the thread stays open 72 hours for follow-ups. The doctor may close it earlier. After closure, any new question is a new consultation.	[C]

ID	Rule	Src
BR-045	Messages are delivered in real time. If both parties are online, the thread behaves like a live chat.	[C]
BR-046	Patients can attach photos to a message.	[C]
BR-047	Photo limits: max 5 images per message, max 10 MB each, JPEG/PNG/HEIC.	[A]

- **Edge cases:** EC-09 – EC-12
- **Error states:** ERR-07 – ERR-09
- **Acceptance criteria:** AC-12 – AC-17
- **Priority:** Must Have

F-06 — Booked Live Text Consultation

- **Purpose:** a guaranteed real-time conversation at a scheduled time.
- **User stories:** US-05
- **Functional requirements:** FR-032 – FR-038
- **Business rules:**

ID	Rule	Src
BR-050	Live chat is booked into an available slot and paid **in advance** to the clinic's wallet.	[C]
BR-051	The doctor defines the session duration.	[C]
BR-052	A booking is only confirmed after the clinic confirms the payment (F-09).	[C]
BR-053	If the patient doesn't join within 15 minutes of the start time, the session converts to an async message and the doctor replies within 24h. No refund.	[C]
BR-054	If the doctor doesn't join within 15 minutes, the patient chooses between rebooking and a full refund.	[C]
BR-055	The chat closes when the session duration ends. Post-session follow-up uses the 72h rule of BR-044.	[A]
BR-056	Live chat is always paid; doctors cannot offer it for free.	[A] Needs confirmation (Q-07)

- **Edge cases:** EC-13 – EC-15
- **Error states:** ERR-10, ERR-11
- **Acceptance criteria:** AC-18 – AC-21
- **Priority:** Must Have

F-07 — In-Person Appointment Booking

- **Purpose:** book a physical examination when a remote consultation isn't enough.
- **User stories:** US-06
- **Functional requirements:** FR-039 – FR-042
- **Business rules:**

ID	Rule	Src
BR-060	In-person visits are paid at the clinic. The platform collects no payment for them.	[C]
BR-061	An in-person booking is confirmed immediately on slot selection, since no prepayment is needed.	[A]
BR-062	Clinic staff or the doctor can mark an in-person visit as Completed or No-show.	[A]

- **Edge cases:** EC-16
- **Error states:** ERR-10
- **Acceptance criteria:** AC-22, AC-23
- **Priority:** Must Have

F-08 — Schedule Management

- **Purpose:** publish real availability for live chat and in-person slots.
- **User stories:** US-15
- **Functional requirements:** FR-043 – FR-046
- **Business rules:**

ID	Rule	Src
BR-065	Availability can be managed by the doctor or by Clinic Staff of the same clinic.	[C]
BR-066	Slots are typed as **Live chat** or **In-person**.	[A]
BR-067	A slot can be booked by only one patient.	[A]
BR-068	Removing availability that already has bookings requires cancelling those bookings, which counts as a clinic cancellation (BR-092).	[A]

- **Edge cases:** EC-17
- **Error states:** ERR-12
- **Acceptance criteria:** AC-24, AC-25
- **Priority:** Must Have

F-09 — Manual Payment Verification

- **Purpose:** confirm direct wallet payments without the platform touching money and without automated wallet integration.
- **User stories:** US-07, US-16
- **Functional requirements:** FR-047 – FR-053
- **Business rules:**

ID	Rule	Src
BR-070	All payments go directly from the patient's wallet to the clinic's or pharmacy's wallet. The platform never receives patient funds.	[C]
BR-071	Supported methods (MVP): PalPay, Jawwal Pay, Bank of Palestine app.	[C]
BR-072	The patient pays outside the platform, then enters the **transaction reference number** in the platform.	[C]

ID	Rule	Src
BR-073	The receiving party (doctor or Clinic Staff for clinics; the pharmacy for orders) checks its wallet and marks the payment **Received** or **Not found**.	[C]
BR-074	Receipt images are not used.	[C]
BR-075	A transaction reference can be used only once across the platform.	[A]
BR-076	If payment is not confirmed within the payment-confirmation window, the held slot or order is released. The window length is an open question (Q-03).	[A]
BR-077	Payment amounts and currency are shown in Israeli Shekel (ILS / ₪).	[A]

- **Edge cases:** EC-18 – EC-21
- **Error states:** ERR-13 – ERR-15
- **Acceptance criteria:** AC-26 – AC-29
- **Priority:** Must Have

F-10 — E-Prescription

- **Purpose:** turn the doctor's decision into an orderable list in Saydaliyati.
- **User stories:** US-13, US-14
- **Functional requirements:** FR-054 – FR-059
- **Business rules:**

ID	Rule	Src
BR-080	A doctor may issue a prescription only for a service performed through the platform: an async message, a live chat, or a completed in-person visit booked on the platform.	[C]
BR-081	Prescription items are selected from the unified catalog (F-11).	[C]
BR-082	If a medicine is not in the catalog, the doctor may add a free-text item. It is shown to the patient as "Not available in Saydaliyati", and a catalog-addition request is sent to the Admin.	[C]
BR-083	Only users with the Doctor role can create prescriptions.	[A]
BR-084	Each item includes medicine, strength/form (from catalog), quantity, and dosage instructions.	[A]
BR-085	A prescription cannot be edited after it is issued. The doctor may cancel it and issue a new one, provided no pharmacy order exists for it.	[A]

- **Edge cases:** EC-22, EC-23
- **Error states:** ERR-16
- **Acceptance criteria:** AC-30 – AC-32
- **Priority:** Must Have

F-11 — Unified Dermatology Medicine Catalog

- **Purpose:** a single naming standard, so a prescribed item matches pharmacy stock.
- **User stories:** US-23, US-14
- **Functional requirements:** FR-060 – FR-063

- **Business rules:**

ID	Rule	Src
BR-086	The catalog contains dermatology medicines and products only.	[C]
BR-087	Only the Platform Admin can create, edit, or deactivate catalog items.	[C]
BR-088	Each item has an Arabic name and an English name.	[C]
BR-089	Pharmacies do not add medicines. They set price and availability for catalog items only.	[C]

- **Edge cases:** EC-24
- **Error states:** ERR-17
- **Acceptance criteria:** AC-33, AC-34
- **Priority:** Must Have

F-12 — Saydaliyati — Pharmacy Search & Matching

- **Purpose:** show where to get the prescribed medicines, at what price, and how far away.
- **User stories:** US-09, US-10
- **Functional requirements:** FR-064 – FR-070
- **Business rules:**

ID	Rule	Src
BR-120	Location uses device GPS as the primary method. If GPS is unavailable or denied, the patient selects an area from a predefined list.	[C]
BR-121	Results are sorted by distance. Pharmacies stocking **all** items are listed first.	[C]
BR-122	Each price shows the pharmacy's "last updated" timestamp.	[C]
BR-123	If no single pharmacy has all items, the patient may either **split** the order across several pharmacies or **buy the available items** from one pharmacy and leave the rest pending on the prescription.	[C]
BR-124	Pharmacies outside working hours, or hidden for non-payment, are not shown.	[C]
BR-125	Free-text (non-catalog) items are never matched to pharmacies.	[C]

- **Edge cases:** EC-25 – EC-28
- **Error states:** ERR-18, ERR-19
- **Acceptance criteria:** AC-35 – AC-39
- **Priority:** Must Have

F-13 — Pharmacy Inventory & Order Confirmation

- **Purpose:** keep data reasonably accurate and guarantee availability before payment.
- **User stories:** US-19, US-20
- **Functional requirements:** FR-071 – FR-078
- **Business rules:**

ID	Rule	Src
BR-130	Pharmacies update price and availability **daily**.	[C]
BR-131	The pharmacy must accept or reject an order within **30 minutes, counted during its working hours**. Otherwise the order is auto-cancelled and the patient may choose another pharmacy.	[C]
BR-132	The patient pays **only after** the pharmacy accepts. The accepted price is the price to pay.	[C]
BR-133	When rejecting, a pharmacy selects a reason: out of stock, price changed, or other.	[A]
BR-134	If price or availability has not been updated for more than 48h, the pharmacy is flagged as "outdated" to patients.	[A]

- **Edge cases:** EC-29 – EC-32
- **Error states:** ERR-20, ERR-21
- **Acceptance criteria:** AC-40 – AC-44
- **Priority:** Must Have

F-14 — Order Pickup

- **Purpose:** secure, flexible pickup.
- **User stories:** US-11, US-21
- **Functional requirements:** FR-079 – FR-083
- **Business rules:**

ID	Rule	Src
BR-095	Once payment is confirmed, the patient receives a **pickup code** (short numeric + QR).	[C]
BR-096	Anyone with the code may collect the order, so a relative can pick it up.	[C]
BR-097	Each pharmacy sets its own pickup window, shown before the patient orders.	[C]
BR-098	The patient receives a reminder **every day** until pickup or expiry.	[C]
BR-099	If the window expires, the order becomes "Expired". What happens to the payment is an **open question** (Q-04).	[A]

- **Edge cases:** EC-33, EC-34
- **Error states:** ERR-22
- **Acceptance criteria:** AC-45 – AC-47
- **Priority:** Must Have

F-15 — Cancellations & Refunds

- **Purpose:** a fair, simple policy, even though the platform doesn't hold funds.
- **User stories:** US-08
- **Functional requirements:** FR-084 – FR-087
- **Business rules:**

ID	Rule	Src
BR-090	Patient cancels a paid booking **≥ 24h** before start → full refund by the clinic.	[C]

ID	Rule	Src
BR-091	Patient cancels **< 24h** before start → no refund.	[C]
BR-092	Clinic or doctor cancels → full refund, always.	[C]
BR-093	Refunds are made by the clinic directly to the patient's wallet. The clinic marks "Refunded" in the platform, and the patient is notified.	[C]
BR-094	Patients can cancel in-person bookings at any time without a financial effect, since nothing was prepaid.	[A]

- **Edge cases:** EC-35, EC-36
- **Error states:** ERR-23
- **Acceptance criteria:** AC-48 – AC-50
- **Priority:** Must Have

F-16 — Notifications

- **Purpose:** keep every party informed, even with intermittent access.
- **Functional requirements:** FR-088 – FR-090
- **Business rules:**

ID	Rule	Src
BR-100	MVP channels are in-app notifications plus PWA push notifications.	[C]
BR-101	Email is used only for account functions (verification, password reset).	[A]

- **Events:** see FR-089.
- **Edge cases:** EC-37
- **Error states:** ERR-24
- **Acceptance criteria:** AC-51
- **Priority:** Must Have

F-17 — Partner Subscriptions

- **Purpose:** enforce the revenue model.
- **User stories:** US-24
- **Functional requirements:** FR-091 – FR-094
- **Business rules:**

ID	Rule	Src
BR-110	Patients never pay the platform.	[C]
BR-111	Clinics and pharmacies get a free trial, then a monthly subscription.	[C]
BR-112	Trial length and subscription prices are **not defined** (Q-05, Q-06).	—
BR-113	If a subscription is unpaid at the due date, a **7-day grace period** applies. After it, the partner is hidden from new patients, while existing bookings and orders continue normally.	[C]
BR-114	The Admin records subscription payments manually in the MVP.	[C]

- **Edge cases:** EC-38
- **Acceptance criteria:** AC-52, AC-53
- **Priority:** Should Have. Manual tracking is enough for the pilot, and enforcement can be manual if this slips.

F-18 — Admin Console

- **Purpose:** operate the marketplace.
- **User stories:** US-22, US-23, US-24
- **Functional requirements:** FR-095 – FR-099
- **Business rules:** BR-004, BR-005, BR-087, BR-113, BR-114
- **Acceptance criteria:** AC-01 – AC-05, AC-33, AC-52
- **Priority:** Must Have

---

11. Functional Requirements

F-01 Clinic & Doctor Onboarding

ID	Requirement	Src
FR-001	The system shall allow a Clinic Manager to self-register a clinic with name, address, map pin, phone, and clinic license document.	[C]
FR-002	The system shall require, for each doctor, a practice license and a dermatology specialty certificate.	[C]
FR-003	The system shall set new clinics and doctors to status **Pending Review** and hide them from patients.	[C]
FR-004	The system shall allow a Platform Admin to view the uploaded documents and Approve or Reject, with a mandatory rejection reason.	[C]/[A]
FR-005	The system shall notify the applicant of approval or rejection.	[A]
FR-006	The system shall allow a rejected applicant to edit and resubmit.	[A]
FR-007	The system shall allow an approved Clinic Manager to invite doctors and Clinic Staff by email.	[C]
FR-008	The system shall keep a newly added doctor hidden until the Admin approves their documents.	[C]
FR-009	The system shall allow a Clinic Manager to deactivate a doctor or staff member. Deactivating a doctor requires handling their future bookings (BR-068).	[A]

F-02 Pharmacy Onboarding

ID	Requirement	Src
FR-010	The system shall allow a pharmacy to self-register with name, address, map pin, phone, pharmacy license, and pharmacist license.	[C]/[A]
FR-011	The system shall require pharmacy working hours (per weekday) and at least one e-wallet payment identifier.	[A]
FR-012	The system shall apply the same Pending Review → Approve/Reject flow as FR-003 – FR-006.	[C]
FR-013	The system shall allow a pharmacy to temporarily mark itself **Closed** (for example during a power outage).	[A]

F-03 Patient Account & Family

ID	Requirement	Src
FR-014	The system shall allow registration with email + password and email verification.	[C]/[A]
FR-015	The system shall provide login, logout, and password reset by email.	[A]
FR-016	The system shall require the account holder to confirm they are 18+.	[C]
FR-017	The system shall allow the account holder to add, edit, and remove family members (name, date of birth, sex, relationship).	[C]/[A]
FR-018	The system shall require selecting the patient of record (self or a family member) for every consultation, booking, and order.	[C]
FR-019	The system shall show the account holder each family member's history separately.	[A]

F-04 Guest Browsing

ID	Requirement	Src
FR-020	The system shall allow unauthenticated users to list and view approved, visible clinics and doctors.	[C]
FR-021	The system shall show each doctor's offered services, prices, and next available slots.	[A]
FR-022	The system shall allow filtering by area and service type.	[A]
FR-023	The system shall prompt guests to register or log in when they attempt a protected action, and return them to that action afterwards.	[A]

F-05 Async Message

ID	Requirement	Src
FR-024	The system shall allow doctors to set async mode to Free, Paid (price), or Disabled.	[C]
FR-025	The system shall allow patients to send a case description with photo attachments (BR-047).	[C]
FR-026	For Paid mode, the system shall run the payment flow (F-09) before delivering the case to the doctor.	[A]
FR-027	The system shall deliver messages in real time when both parties are online.	[C]
FR-028	The system shall show the patient the response deadline (24h).	[A]
FR-029	The system shall, at 24h without a doctor response, mark the consultation **Expired – No response**, notify the patient, and, if paid, create a refund obligation for the clinic.	[C]
FR-030	The system shall close the thread automatically 72h after the doctor's first response, and allow the doctor to close it earlier.	[C]
FR-031	The system shall not show medical content (text, photos) to Clinic Staff.	[C]

F-06 Live Chat

ID	Requirement	Src
FR-032	The system shall allow doctors to set the live-chat price and session duration.	[C]
FR-033	The system shall allow a patient to select an available live-chat slot and hold it pending payment.	[C]/[A]
FR-034	The system shall confirm the booking only after payment is confirmed (F-09).	[C]

ID	Requirement	Src
FR-035	The system shall open the chat room at the start time and show both parties a join indicator.	[A]
FR-036	The system shall, if the patient hasn't joined after 15 min, convert the session to an async consultation with a 24h response deadline.	[C]
FR-037	The system shall, if the doctor hasn't joined after 15 min, offer the patient Rebook or Refund.	[C]
FR-038	The system shall end the live session at the configured duration and then apply the 72h follow-up window.	[A]

F-07 In-Person Booking

ID	Requirement	Src
FR-039	The system shall allow a patient to book an available in-person slot without prepayment.	[C]
FR-040	The system shall show the clinic address, map pin, and the price payable at the clinic.	[C]/[A]
FR-041	The system shall allow the doctor or staff to mark the visit Completed or No-show.	[A]
FR-042	The system shall enable prescribing only for visits marked Completed.	[C]/[A]

F-08 Schedule

ID	Requirement	Src
FR-043	The system shall allow the doctor or Clinic Staff to define recurring weekly availability per slot type.	[C]/[A]
FR-044	The system shall allow one-off blocking of dates or times.	[A]
FR-045	The system shall prevent double-booking of a slot.	[A]
FR-046	The system shall show the doctor and staff a calendar of bookings.	[A]

F-09 Payment Verification

ID	Requirement	Src
FR-047	The system shall show the patient the amount, the recipient's wallet identifier(s), and instructions.	[C]/[A]
FR-048	The system shall require the patient to enter the transaction reference number and the wallet used.	[C]
FR-049	The system shall reject a reference number already used on the platform.	[A]
FR-050	The system shall present pending payments to the recipient (doctor or Clinic Staff, or the pharmacy), with Received / Not found actions.	[C]
FR-051	On **Not found**, the system shall notify the patient and allow them to correct the reference once more before the hold is released.	[A]
FR-052	The system shall release the held slot or order if not confirmed within the payment-confirmation window (Q-03).	[A]
FR-053	The system shall log who confirmed each payment and when.	[A]

F-10 E-Prescription

ID	Requirement	Src
FR-054	The system shall allow a doctor to create a prescription linked to an eligible service (BR-080).	[C]

ID	Requirement	Src
FR-055	The system shall provide catalog search by Arabic or English name.	[C]/[A]
FR-056	The system shall allow free-text items flagged "Not available in Saydaliyati", and automatically create a catalog-addition request.	[C]
FR-057	The system shall capture quantity and dosage instructions per item.	[A]
FR-058	The system shall deliver the issued prescription to the patient's Saydaliyati and notify them.	[C]
FR-059	The system shall allow the doctor to cancel a prescription only if no pharmacy order exists for it.	[A]

F-11 Catalog

ID	Requirement	Src
FR-060	The system shall allow the Admin to create, edit, and deactivate catalog items (AR name, EN name, form, strength).	[C]/[A]
FR-061	The system shall list catalog-addition requests to the Admin with Approve/Reject.	[C]
FR-062	The system shall prevent duplicate items with the same EN name + form + strength.	[A]
FR-063	The system shall keep deactivated items on existing prescriptions but hide them from new prescriptions.	[A]

F-12 Saydaliyati

ID	Requirement	Src
FR-064	The system shall request GPS location and fall back to area selection.	[C]
FR-065	The system shall list open, visible pharmacies with distance, total price for the available items, availability per item, and last-updated time.	[C]
FR-066	The system shall rank pharmacies with full availability first, each group by distance.	[C]
FR-067	The system shall allow the patient to build a split order (one sub-order per pharmacy).	[C]
FR-068	The system shall allow the patient to order a subset of items and keep the remaining items "Pending" on the prescription.	[C]
FR-069	The system shall show each pharmacy's pickup window before ordering.	[C]
FR-070	The system shall show a "no pharmacy available" state with the option to retry later or change area (ERR-18).	[A]

F-13 Pharmacy Inventory & Orders

ID	Requirement	Src
FR-071	The system shall allow a pharmacy to set price and in-stock status per catalog item.	[C]
FR-072	The system shall provide a quick daily update screen (bulk confirm of "no change").	[A]
FR-073	The system shall timestamp every update and display "last updated".	[C]
FR-074	The system shall send new orders to the pharmacy with an Accept / Reject action and a visible countdown.	[C]
FR-075	The system shall count the 30-minute window only during the pharmacy's working hours.	[C]
FR-076	The system shall auto-cancel an order not answered in time and notify the patient.	[C]
FR-077	The system shall show the pharmacy the requested items only, with no diagnosis or other medical content.	[C]

ID	Requirement	Src
FR-078	The system shall allow the pharmacy to confirm payment (F-09) after acceptance.	[C]

F-14 Pickup

ID	Requirement	Src
FR-079	The system shall generate a unique pickup code (numeric + QR) after payment confirmation.	[C]
FR-080	The system shall make the pickup code viewable offline once loaded (PWA cache).	[A]
FR-081	The system shall allow the pharmacy to enter or scan the code and mark the order **Delivered**.	[C]
FR-082	The system shall send a daily reminder until Delivered or Expired.	[C]
FR-083	The system shall mark the order **Expired** at the end of the pickup window.	[C]

F-15 Cancellations

ID	Requirement	Src
FR-084	The system shall allow the patient to cancel bookings and show the refund outcome before confirming.	[C]
FR-085	The system shall allow the clinic to cancel bookings with a reason.	[A]
FR-086	The system shall create a refund task for the clinic when BR-090, BR-092, or BR-043 applies, and allow it to be marked "Refunded".	[C]
FR-087	The system shall show overdue refund tasks (older than 72h) to the Admin.	[A]

F-16 Notifications

ID	Requirement	Src
FR-088	The system shall provide an in-app notification center and PWA push notifications.	[C]
FR-089	The system shall notify on these events: doctor reply; booking confirmed, cancelled, or reminded; payment confirmed or not found; prescription issued; pharmacy accepted, rejected, or auto-cancelled; pickup code issued; daily pickup reminder; refund marked; approval or rejection; subscription due or hidden.	[C]/[A]
FR-090	The system shall send a booking reminder before each live chat and in-person appointment (timing in Q-12).	[A]

F-17 Subscriptions

ID	Requirement	Src
FR-091	The system shall track per partner: trial start/end, status (Trial / Active / Grace / Hidden), and next due date.	[C]
FR-092	The system shall allow the Admin to record a subscription payment manually.	[C]
FR-093	The system shall move a partner to Grace at the due date and to Hidden after 7 days unpaid.	[C]
FR-094	The system shall keep existing bookings and orders of Hidden partners fully functional.	[C]

F-18 Admin Console

ID	Requirement	Src
FR-095	The system shall provide a verification queue (clinics, doctors, pharmacies).	[C]
FR-096	The system shall provide catalog management and addition requests.	[C]
FR-097	The system shall provide partner subscription management.	[C]
FR-098	The system shall allow the Admin to suspend any partner or patient account, with a reason.	[A]
FR-099	The system shall **not** give the Admin access to medical content (messages, photos, diagnoses) in the MVP.	[A] Consistent with BR on privacy; needs confirmation (Q-10)

---

12. Non-Functional Requirements

ID	Category	Requirement	Src
NFR-001	Platform	Responsive web app; installable PWA on Android and iOS browsers with push notifications.	[C]
NFR-002	Localization	Arabic UI, full RTL layout; medicine names in AR + EN; Arabic-Indic or Western digits, consistently.	[C]/[A]
NFR-003	Performance	The first meaningful screen loads in ≤ 3 s on a 3G connection (1.6 Mbps); page weight ≤ 1 MB excluding user images.	[A]
NFR-004	Resilience	Unsent messages and form data are kept locally and retried when the connection returns.	[A]
NFR-005	Offline	Pickup codes, the last-loaded prescriptions, and booking details are viewable offline.	[A]
NFR-006	Images	Photos are compressed client-side before upload (target ≤ 1 MB) while keeping diagnostic quality.	[A]
NFR-007	Availability	99.5% monthly uptime for the platform (excluding the user's own connectivity).	[A]
NFR-008	Real-time	Chat messages are delivered in ≤ 2 s when both parties are online.	[A]
NFR-009	Time	All times use the Asia/Gaza timezone; SLA timers are server-side.	[A]
NFR-010	Accessibility	WCAG 2.1 AA for contrast, font scaling, and touch targets.	[A]
NFR-011	Auditability	Approvals, payment confirmations, refunds, and prescription issuance are audit-logged (who, what, when).	[A]
NFR-012	Scalability	Supports pilot scale (≥ 50 clinics, 100 pharmacies, 10,000 patients) without redesign.	[A]
NFR-013	Tech stack	Next.js (PWA) + Supabase (PostgreSQL, Auth, Storage, Realtime).	[D]
NFR-014	Browsers	Latest 2 versions of Chrome (Android), Safari (iOS), Chrome/Edge (desktop).	[A]

---

13. User Flows

UF-1 Patient: async message → prescription → pickup (core journey)

1. A guest browses doctors (F-04) and opens a doctor's profile.

2. They tap "Send a message" and are asked to log in or register (F-03). After that they return to the same doctor.
3. They select the patient of record (self or a family member).
4. They write the case and attach photos.
5. **If the doctor's async mode is Paid:** the payment screen appears, the patient pays in the wallet app and enters the reference, and the clinic confirms (F-09). **If Free:** the case is sent immediately.
6. The doctor replies within 24h. Otherwise the consultation expires, the patient is notified, and a refund task is created if it was paid.
7. The follow-up window of 72h starts. The doctor may issue a prescription (F-10).
8. The patient opens Saydaliyati, allows GPS or picks an area, and sees the ranked pharmacies (F-12).
9. The patient picks a pharmacy, or splits the order, or buys a subset → the order is sent.
10. The pharmacy accepts within 30 working minutes, or the order auto-cancels and the patient returns to step 8.
11. The patient pays the pharmacy's wallet and enters the reference. The pharmacy confirms.
12. The pickup code is issued, and daily reminders run until pickup.
13. The pharmacy scans or enters the code and marks the order **Delivered**.

UF-2 Patient: booked live chat

1. The patient selects a doctor, then the Live chat service, then a slot. The slot is held.
2. Payment flow (F-09). Once confirmed, the booking is Confirmed and a reminder is scheduled.
3. At the start time both parties join. - Patient absent after 15 min → the session converts to async with a 24h reply deadline (no refund). - Doctor absent after 15 min → the patient chooses Rebook or Refund.
4. The session ends at its duration, then the 72h follow-up window applies, and a prescription may be issued.

UF-3 Patient: in-person visit

1. The patient selects the doctor, then In-person, then a slot. The booking is Confirmed (no prepayment).
2. The patient visits the clinic and pays there.
3. Staff or the doctor marks the visit Completed or No-show.
4. If Completed, the doctor may issue an e-prescription and the flow continues with UF-1 steps 8–13.

UF-4 Patient cancellation

1. The patient opens the booking and taps Cancel. The system shows the outcome: refund (≥ 24h) or no refund (< 24h).
2. When the patient confirms, the booking is Cancelled, and a refund task is created if applicable.
3. The clinic refunds the wallet and marks it Refunded. The patient is notified.

UF-5 Clinic onboarding

1. The Clinic Manager registers the clinic with documents and the map pin. Status: Pending.
2. The Admin reviews and approves, or rejects with a reason (the applicant can fix and resubmit).

3. Once approved, the clinic sets wallet identifiers, invites doctors and staff, and sets schedules and prices.
4. Each doctor is reviewed by the Admin before going visible.
5. The trial starts. At its end the subscription is due, followed by the grace period and then hiding if unpaid.

UF-6 Pharmacy onboarding & daily operations

1. Registration → Admin review (as in UF-5).
2. The pharmacy sets working hours and wallet identifiers, then sets price and stock for catalog items.
3. Daily: confirm or update prices and stock.
4. Handle incoming orders (Accept/Reject), confirm payments, and deliver against pickup codes.

UF-7 Admin

1. Process the verification queue.
2. Process catalog-addition requests.
3. Record subscription payments, and monitor overdue refunds and suspensions.

---

14. Pages / Screens

(Inventory only — no UI design.)

#	Screen	Roles
S-01	Home / doctor & clinic listing (filters: area, service)	Guest, Patient
S-02	Clinic profile (address, map, doctors)	Guest, Patient
S-03	Doctor profile (services, prices, availability)	Guest, Patient
S-04	Register / Login / Verify email / Reset password	Guest
S-05	Patient profile & family members	Patient
S-06	New async message (patient selector, text, photos)	Patient
S-07	Slot picker (live chat / in-person)	Patient
S-08	Payment instructions & reference entry	Patient
S-09	My consultations & bookings (by family member)	Patient
S-10	Conversation thread (async/live)	Patient, Doctor
S-11	Saydaliyati — prescriptions list	Patient
S-12	Saydaliyati — pharmacy results (location, ranking, split/subset)	Patient
S-13	Order status & pickup code (offline-capable)	Patient
S-14	Notification center	All logged-in roles
S-15	Clinic registration wizard	Clinic Manager
S-16	Clinic dashboard (doctors, staff, wallet IDs, settings)	Clinic Manager
S-17	Schedule / calendar management	Doctor, Clinic Staff

#	Screen	Roles
S-18	Pending payments & refund tasks	Doctor, Clinic Staff
S-19	Doctor inbox (async + live sessions)	Doctor
S-20	Prescription editor (catalog search + free text)	Doctor
S-21	Doctor service settings (async mode/price, live price/duration, in-person price)	Doctor
S-22	Pharmacy registration wizard	Pharmacy
S-23	Pharmacy inventory (daily update)	Pharmacy
S-24	Pharmacy orders (countdown, accept/reject, payment confirm, pickup verify)	Pharmacy
S-25	Pharmacy settings (working hours, pickup window, wallet IDs, Closed toggle)	Pharmacy
S-26	Admin verification queue	Admin
S-27	Admin catalog & addition requests	Admin
S-28	Admin partners & subscriptions	Admin
S-29	Admin overdue refunds & suspensions	Admin

15. Roles & Permissions

Capability	Guest	Patient	Doctor	Clinic Staff	Clinic Manager	Pharmacy	Admin
Browse clinics/doctors	✅	✅	✅	✅	✅	✅	✅

16. Data Requirements

(Logical data entities only — not an ERD.)

Entity	Key attributes	Notes / retention
User account	email, password hash, role(s), phone, status, 18+ confirmation	[C]/[A]
Family member	account holder, name, DOB, sex, relationship	[C]
Clinic	name, address, geo-pin, phone, license doc, status, wallet IDs, subscription status	[C]
Doctor	user, clinic, practice license doc, specialty certificate doc, status, service settings (async mode/price, live price/duration, in-person price)	[C]
Clinic staff	user, clinic	[C]
Pharmacy	name, address, geo-pin, phone, license docs, working hours, pickup window, wallet IDs, Closed flag, subscription status	[C]/[A]
Catalog item	AR name, EN name, form, strength, active flag	[C]
Catalog addition request	requested text, doctor, status	[C]
Pharmacy stock	pharmacy, catalog item, price (ILS), in-stock, updated_at	[C]
Availability slot	doctor, type (live / in-person), start, end, status	[C]/[A]
Consultation	type (async / live / in-person), patient of record, doctor, status, timestamps, SLA deadline, closes_at	[C]
Message	consultation, sender, text, attachments, sent_at	Medical data
Attachment (photo)	file ref, consultation	Medical data; private storage
Payment record	payer, payee, amount, wallet, reference no. (unique), status, confirmed_by, confirmed_at	[C]
Prescription	consultation, doctor, patient of record, items (catalog or free-text, qty, dosage), status	[C]
Pharmacy order	prescription, pharmacy, items, accepted price, status, accept deadline, pickup code, pickup expiry	[C]
Refund task	related booking/consultation, amount, status, marked_by	[C]
Subscription	partner, plan, trial end, due date, status, payments	[C]
Notification	user, event, read flag	[C]

Entity	Key attributes	Notes / retention
Audit log	actor, action, target, timestamp	[A]

Retention policy for medical data: not defined (Q-11).

17. Integrations

ID	Integration	MVP?	Notes
INT-1	E-wallets (PalPay, Jawwal Pay, Bank of Palestine)	**No API.** Manual reference entry + manual confirmation	API integration in Phase 2, subject to provider availability (DEP-1). [C]
INT-2	Maps / geolocation (map pin, distance)	Yes	Browser Geolocation API + a map tile provider; area list maintained by Admin. [A]
INT-3	Web Push (PWA)	Yes	Note: iOS supports web push only when the PWA is installed to the home screen. [A]
INT-4	Transactional email (verification, reset)	Yes	Any email provider. [A]
INT-5	Backend services (DB, auth, storage, realtime)	Yes	Supabase [D]

18. Edge Cases

ID	Edge case	Expected behavior	Feature
EC-01	A clinic registers with documents for some doctors missing.	The clinic can be approved. Only doctors with complete, approved documents are visible. A clinic with zero visible doctors is not listed. [A]	F-01
EC-02	The same doctor is registered by two clinics.	Blocked by BR-006 (unique practice license number). [A]	F-01
EC-03	A doctor's license expires.	Out of scope for the MVP. License expiry tracking is listed in §24. [A]	F-01
EC-04	A clinic changes address (displacement).	The address change requires Admin re-review. The clinic stays visible meanwhile, with the old address flagged. [A]	F-01
EC-05	A pharmacy relocates or closes temporarily.	Uses the Closed toggle (FR-013). Closed pharmacies are excluded from results.	F-02
EC-06	A minor wants to use the platform alone.	Not allowed. The minor must be added under an adult.	F-03
EC-07	A family member turns 18.	Remains under the parent's account. Splitting the history is out of scope. [A]	F-03
EC-08	A doctor has no free slots.	The profile shows "No availability"; async messaging is still available if enabled.	F-04
EC-09	A doctor switches async mode from Free to Paid while free cases are open.	Open cases keep their original terms. [A]	F-05

ID	Edge case	Expected behavior	Feature
EC-10	The doctor goes offline mid-thread (power cut).	Messages queue. The 24h SLA only governs the first response; follow-ups are best-effort within 72h. [A]	F-05
EC-11	The patient sends follow-ups after the 72h closure.	The input is disabled with the prompt "Start a new consultation".	F-05
EC-12	A photo upload fails on a weak connection.	Retry with local caching (NFR-004); the message isn't sent until all attachments upload, or the user removes the failed one.	F-05
EC-13	Both the patient and the doctor fail to join.	Treated as a doctor no-show (the patient's protection prevails). [A]	F-06
EC-14	Connection drops mid-session.	The chat persists; the remaining conversation continues asynchronously. The session isn't extended. [A]	F-06
EC-15	The doctor joins late (within 15 min).	The session runs until the original end time. [A]	F-06
EC-16	The patient doesn't show for an in-person visit.	Marked No-show; no prescription can be issued.	F-07
EC-17	Staff and doctor edit the schedule at the same time.	Last write wins, with a conflict check against existing bookings (FR-045).	F-08
EC-18	The patient enters a wrong reference.	The recipient marks Not found → the patient may correct it once (FR-051).	F-09
EC-19	The patient pays the wrong amount.	The recipient marks Not found and states the reason. Settling the difference happens off-platform. Open question Q-08.	F-09
EC-20	The clinic never confirms a valid payment.	The hold is released when the window ends; the patient is told to contact the clinic. Escalation to Admin: Q-03.	F-09
EC-21	Two patients race for the same slot.	The first to *start* payment holds the slot; the other sees "slot no longer available".	F-09
EC-22	The prescription has only free-text items.	Saydaliyati shows the prescription with all items marked "Not available in Saydaliyati".	F-10
EC-23	The doctor prescribes for the wrong family member.	The doctor cancels the prescription (if no order exists) and reissues.	F-10
EC-24	The Admin deactivates a catalog item that is on open orders.	Existing orders proceed; the item disappears from new prescriptions and searches.	F-11
EC-25	GPS is denied or inaccurate.	Area selection is offered.	F-12
EC-26	No pharmacy has any item.	ERR-18 state.	F-12
EC-27	A pharmacy's price data is older than 48h.	Shown with an "outdated" badge; still orderable, since the pharmacy confirms the price anyway. [A]	F-12
EC-28	The patient splits the order, and one sub-order is rejected.	The other sub-orders proceed; the rejected items return to "Pending".	F-12
EC-29	An order arrives 10 min before closing time.	10 min count today; the remaining 20 min count after opening the next working day.	F-13
EC-30	The pharmacy accepts at a different price than listed.	The accepted price prevails; the patient may decline before paying. [A]	F-13
EC-31	The pharmacy runs out after accepting and after payment.	The pharmacy must refund and cancel. Handling and penalties: Q-09.	F-13

ID	Edge case	Expected behavior	Feature
EC-32	The patient never pays after acceptance.	The order is released when the payment window ends (Q-03).	F-13
EC-33	The patient loses their phone or code.	The code is retrievable after logging in on any device.	F-14
EC-34	The pickup window expires.	Status becomes Expired; refund handling is open (Q-04).	F-14
EC-35	Cancellation at exactly 24h before start.	Counts as ≥ 24h (refund). [A]	F-15
EC-36	The clinic never marks a refund.	Shown to the Admin as overdue after 72h (FR-087). Enforcement: Q-08.	F-15
EC-37	Push notifications are not permitted, or iOS without PWA install.	In-app notifications only; the UI nudges the user to install the PWA and enable push.	F-16
EC-38	A partner is hidden while a patient is mid-booking.	The booking in progress may complete. [A]	F-17

19. Error States

ID	Trigger	User-facing message (intent)	Recovery
ERR-01	Required document missing or invalid file type/size	"Please upload [document] (PDF/JPG/PNG, max 10 MB)"	Re-upload
ERR-02	Registration rejected by Admin	"Your application was not approved: [reason]"	Edit & resubmit
ERR-03	Map pin not set	"Set your location on the map"	Set pin
ERR-04	Email already registered	"This email is already registered"	Login / reset
ERR-05	Email not verified when booking	"Verify your email to continue"	Resend verification
ERR-06	Listing fails to load (offline)	"You're offline — showing last loaded results"	Auto-retry
ERR-07	Async messaging disabled by the doctor	"This doctor isn't accepting messages"	Book a live chat/in-person, or another doctor
ERR-08	Photo upload failed	"Photo failed to upload — retry"	Retry/remove
ERR-09	Message after thread closed	"This consultation is closed"	New consultation
ERR-10	Slot taken	"This time is no longer available"	Pick another slot
ERR-11	Live session join failure	"Connection problem — your messages will be delivered when you reconnect"	Auto-reconnect
ERR-12	Schedule conflict with existing booking	"This change affects N bookings"	Cancel bookings (clinic cancellation) or abort
ERR-13	Reference already used	"This transaction number was already used"	Re-enter
ERR-14	Payment marked Not found	"The clinic/pharmacy couldn't find your payment"	Correct reference once
ERR-15	Payment window expired	"Your reservation expired because payment wasn't confirmed"	Start again
ERR-16	Prescribing on an ineligible service	"Prescriptions can only follow a completed consultation on the platform"	—

ID	Trigger	User-facing message (intent)	Recovery
ERR-17	Duplicate catalog item	"This medicine already exists"	Edit existing
ERR-18	No pharmacy has the items	"No nearby pharmacy currently has these medicines"	Change area / retry later / notify me (future)
ERR-19	Location unavailable	"We couldn't get your location — choose your area"	Area picker
ERR-20	Pharmacy rejected order	"The pharmacy couldn't fulfil your order: [reason]"	Choose another pharmacy
ERR-21	Pharmacy didn't respond in time	"The pharmacy didn't respond in time"	Choose another pharmacy
ERR-22	Invalid pickup code	"Code not valid for this pharmacy"	Re-enter / check order
ERR-23	Cancel after session start	"This booking can no longer be cancelled"	—
ERR-24	Push permission denied	"Turn on notifications to get doctor replies quickly"	Settings guidance

20. Security & Privacy Requirements

ID	Requirement	Src
SEC-01	Medical content (messages, photos, diagnoses, prescriptions) is accessible **only** to the patient account holder and the treating doctor of that consultation.	[C]
SEC-02	Pharmacies see only the items, quantities, and patient of record name for orders sent to them, with no diagnosis or photos.	[C]
SEC-03	Clinic Staff see appointments and payments, but no medical content.	[C]
SEC-04	Authorization is enforced server-side (row-level security), not only in the UI.	[A]
SEC-05	Medical photos are stored in private storage and served via short-lived signed URLs; they are never public.	[A]
SEC-06	All traffic uses TLS 1.2+; data at rest is encrypted.	[A]
SEC-07	Passwords: minimum 8 characters; hashed with an industry-standard algorithm; login rate-limited.	[A]
SEC-08	Partner documents (licenses) are visible only to the uploading partner and Admins.	[A]
SEC-09	Audit log for access-sensitive actions (NFR-011).	[A]
SEC-10	Location is used only at search time and is not stored beyond the session.	[A]
SEC-11	Patients can request account deletion. Medical-record retention obligations apply (Q-11).	[A]
SEC-12	Applicable Palestinian telemedicine, e-prescription, and data-protection regulations must be confirmed before launch (RISK-3).	[A]

21. Analytics & Tracking

Events to instrument (no third-party sharing of medical data):

Event	Purpose
`guest_view_doctor`, `signup_completed`	Acquisition funnel
`async_sent` (free/paid), `async_first_response` (latency), `async_expired_no_response`	SLA compliance
`live_booked`, `live_patient_noshow`, `live_doctor_noshow`, `inperson_booked`, `inperson_completed`	Service usage
`payment_reference_submitted`, `payment_confirmed` (latency), `payment_not_found`	Payment friction
`prescription_issued` (catalog vs free-text ratio)	Catalog coverage
`saydaliyati_search` (GPS vs area), `no_pharmacy_result`	Availability gaps
`order_sent`, `order_accepted` (latency), `order_rejected` (reason), `order_auto_cancelled`	Pharmacy responsiveness
`order_delivered`, `order_expired`	Fulfilment
`booking_cancelled` (≥/<24h, by whom), `refund_marked` (latency)	Policy health
`inventory_updated` (per pharmacy per day)	Data freshness
`partner_status_changed` (Trial/Active/Grace/Hidden)	Revenue

---

22. Success Metrics / KPIs

Targets were not set by the product owner ("not defined yet"). These are the proposed KPIs to track; targets are an open question (Q-13).

KPI	Definition
Active partners	# approved, visible clinics and pharmacies
Registered patients	# verified patient accounts
Async SLA compliance	% first responses within 24h
Prescription → order conversion	% prescriptions with ≥ 1 delivered order
Pharmacy acceptance rate	% orders accepted within 30 working minutes
Pickup completion	% paid orders delivered before expiry
Payment confirmation time	median time from reference entry to confirmation
Inventory freshness	% pharmacies updated in the last 24h
Trial → paid conversion	% partners paying after trial
Catalog coverage	% prescription items from catalog (vs free text)

---

23. Acceptance Criteria

F-01 Clinic & Doctor Onboarding

- **AC-01:** Given a Clinic Manager on the registration form, when they submit without a clinic license, then submission is blocked and ERR-01 is shown.

- **AC-02:** Given a submitted clinic, when it is in Pending Review, then it does not appear in any patient or guest listing.
- **AC-03:** Given a pending clinic, when an Admin rejects it without a reason, then the system blocks the action until a reason is entered.
- **AC-04:** Given an approved clinic, when the Manager adds a new doctor, then that doctor is not visible to patients until an Admin approves the doctor's practice license and specialty certificate.
- **AC-05:** Given a clinic registration, when no map pin is set, then submission is blocked (ERR-03).

F-02 Pharmacy Onboarding

- **AC-06:** Given a pharmacy registration, when working hours or wallet identifier are missing, then submission is blocked.
- **AC-07:** Given an approved pharmacy toggled to Closed, when a patient searches Saydaliyati, then that pharmacy is not listed.

F-03 Patient Account

- **AC-08:** Given a guest viewing a doctor, when they tap "Send message", then they are asked to log in/register and, after success, return to the same doctor's message screen.
- **AC-09:** Given a patient with two children added, when starting a consultation, then they must select one patient of record before proceeding.
- **AC-10:** Given registration, when the user does not confirm 18+, then the account cannot be created.

F-04 Browsing

- **AC-11:** Given a clinic in Hidden subscription status, when a guest browses, then the clinic and its doctors are not listed.

F-05 Async Message

- **AC-12:** Given a doctor with async mode Disabled, when a patient opens the profile, then "Send message" is unavailable (ERR-07).
- **AC-13:** Given a doctor with async mode Free, when a patient sends a case with 3 photos, then the doctor receives it immediately and the patient sees a 24h response deadline.
- **AC-14:** Given a doctor with async mode Paid, when the patient submits a case, then it is not delivered to the doctor until the clinic marks the payment Received.
- **AC-15:** Given an async case with no doctor reply, when 24h elapse, then the status becomes "Expired – No response", the patient is notified, and, if paid, a refund task is created for the clinic.
- **AC-16:** Given the doctor's first reply at time T, when T + 72h is reached, then the thread closes and the patient cannot send further messages (ERR-09).
- **AC-17:** Given an open async thread, when a Clinic Staff user opens the clinic dashboard, then no message text or photos are visible to them.

F-06 Live Chat

- **AC-18:** Given a held live-chat slot, when payment is not confirmed, then the booking is not Confirmed and the slot is not shown as available to others while the hold lasts.
- **AC-19:** Given a confirmed live session, when the patient has not joined 15 minutes after start, then the session converts to async with a 24h response deadline and no refund task is created.
- **AC-20:** Given a confirmed live session, when the doctor has not joined 15 minutes after start, then the patient is offered Rebook or Refund, and choosing Refund creates a refund task.
- **AC-21:** Given a live session with a 20-minute duration, when 20 minutes elapse from start, then the live session ends and the 72h follow-up window begins.

F-07 In-Person

- **AC-22:** Given an available in-person slot, when the patient books it, then it is confirmed without any payment step and shows the clinic address and price payable at the clinic.
- **AC-23:** Given an in-person visit marked No-show, when the doctor tries to create a prescription for it, then the action is blocked (ERR-16).

F-08 Schedule

- **AC-24:** Given Clinic Staff of clinic X, when they edit doctor Y's schedule at clinic X, then the change is saved; given staff of clinic Z, then access is denied.
- **AC-25:** Given a slot booked by patient A, when patient B tries to book the same slot, then B receives ERR-10.

F-09 Payment Verification

- **AC-26:** Given a payment screen, when the patient submits without a reference number, then submission is blocked.
- **AC-27:** Given reference "12345" already used on the platform, when another payment is submitted with "12345", then ERR-13 is shown.
- **AC-28:** Given a pending payment, when the recipient marks Not found, then the patient is notified and can correct the reference exactly once.
- **AC-29:** Given a confirmed payment, when viewed in the audit log, then the confirming user and timestamp are recorded.

F-10 E-Prescription

- **AC-30:** Given a completed platform consultation, when the doctor issues a prescription with 2 catalog items, then it appears in the patient's Saydaliyati and the patient is notified.
- **AC-31:** Given a doctor adding a medicine not in the catalog, when they enter it as free text, then it appears to the patient as "Not available in Saydaliyati" and a catalog-addition request appears in the Admin queue.
- **AC-32:** Given a Clinic Staff user, when they attempt to create a prescription, then access is denied.

F-11 Catalog

- **AC-33:** Given an Admin, when creating an item with the same EN name, form, and strength as an existing item, then ERR-17 is shown.
- **AC-34:** Given a catalog item, when displayed to patients, doctors, or pharmacies, then both Arabic and English names are shown.

F-12 Saydaliyati

- **AC-35:** Given GPS permission denied, when the patient opens pharmacy results, then an area picker is shown and results are sorted by distance from the chosen area.
- **AC-36:** Given 3 prescribed items, pharmacy A (2 km) with all 3 and pharmacy B (1 km) with 2, when results load, then A is listed before B.
- **AC-37:** Given each listed pharmacy, when results load, then each shows total price for available items and a "last updated" timestamp.
- **AC-38:** Given no pharmacy with all items, when the patient chooses Split, then one sub-order per selected pharmacy is created; when they choose Subset, then unordered items remain "Pending" on the prescription.
- **AC-39:** Given a pharmacy outside its working hours, when a patient searches, then it is not listed.

F-13 Pharmacy Orders

- **AC-40:** Given a new order at 10:00 during working hours, when the pharmacy has not responded by 10:30, then the order auto-cancels and the patient is notified (ERR-21).
- **AC-41:** Given an order received 10 minutes before closing, when the pharmacy reopens next working day, then the remaining 20 minutes count from opening time.
- **AC-42:** Given a sent order, when the pharmacy has not yet accepted, then the patient sees no payment option.
- **AC-43:** Given a pharmacy viewing an order, when they open it, then they see only items, quantities, and patient of record name, with no diagnosis or photos.
- **AC-44:** Given a pharmacy price update, when saved, then the "last updated" timestamp shown to patients reflects the save time.

F-14 Pickup

- **AC-45:** Given a pharmacy-confirmed payment, when confirmation is saved, then a unique pickup code (numeric + QR) is shown to the patient and remains viewable offline.
- **AC-46:** Given a paid order not yet collected, when each day passes within the pickup window, then the patient receives one reminder per day.
- **AC-47:** Given a pharmacy entering a code belonging to another pharmacy's order, when submitted, then ERR-22 is shown and the order isn't delivered.

F-15 Cancellations

- **AC-48:** Given a paid booking starting in 30 hours, when the patient cancels, then the system shows "full refund", and on confirmation a refund task is created.
- **AC-49:** Given a paid booking starting in 10 hours, when the patient cancels, then the system shows "no refund" before confirmation and no refund task is created.
- **AC-50:** Given a clinic cancelling any paid booking, when confirmed, then a refund task is created regardless of timing.

F-16 Notifications

- **AC-51:** Given a patient with push enabled, when the doctor replies, then the patient receives a push notification and an in-app notification.

F-17 Subscriptions

- **AC-52:** Given a partner whose subscription is due today and unpaid, when 7 days pass without the Admin recording payment, then the partner becomes Hidden from new patients.
- **AC-53:** Given a Hidden clinic with a confirmed booking next week, when the date arrives, then the booking proceeds normally.

---

24. Future Features

Phase	Feature	Origin
2	Video consultations	[C] deferred
2	Treatment session/package booking	[C] deferred
2	Automated e-wallet integration (API)	[C] deferred
2	Native mobile apps (store)	[C] deferred
2	Ratings & reviews (doctors, pharmacies)	[A] deferred
2	WhatsApp / SMS notifications	[A]
2	Automated subscription billing	[A]
3	English UI	[A]
3	"Notify me when available" for out-of-stock medicines	[A]
3	Delivery of medicines	[A]
3	License expiry tracking & re-verification	[A]
3	Expansion to the West Bank / other specialties	[A]
3	Admin analytics dashboard	[A]

---

25. Risks & Dependencies

ID	Risk / Dependency	Impact	Mitigation
RISK-1	Unreliable power/internet in Gaza	Missed SLAs, failed uploads	Async-first design, offline caching, retry queues (NFR-004/005)
RISK-2	Pharmacies don't update prices/stock daily	Stale data, rejected orders	Dermatology-only catalog, quick-update screen, "last updated" + outdated badge, pharmacy confirmation before payment
RISK-3	Regulatory: telemedicine and e-prescription legality in Palestine/Gaza; prescription-only medicines	Launch blocker	Legal review before launch (Q-14)
RISK-4	Manual payment confirmation is slow or errors	Abandoned bookings/orders	Clear payment window, single-use references, Admin visibility of overdue tasks
RISK-5	Refunds depend on clinics/pharmacies acting in good faith (platform holds no money)	Patient trust	Overdue-refund monitoring, suspension power (FR-098); policy for enforcement (Q-08)
RISK-6	Medicine shortages	No-match results	Split/subset orders; free-text items
RISK-7	Partner acquisition during free trial; conversion to paid	Revenue	Define trial length and pricing early (Q-05/06)
RISK-8	Problem/demand not validated with user research	Product-market fit	Pilot with a small set of clinics/pharmacies
RISK-9	iOS web push limited to installed PWAs	Missed notifications	In-app center, install prompts
DEP-1	E-wallet providers' merchant API availability	Phase 2 automation	Contact providers
DEP-2	Map/geo data quality for Gaza areas	Distance accuracy	Admin-maintained area list
DEP-3	Initial catalog content (dermatology medicines, AR/EN names)	Launch blocker	Admin/pharmacist to compile before launch

26. Open Questions

26.1 Quality review findings

#	Check	Finding	Resolution
QR-1	Conflicts	Original idea: "pick up **any time**" vs later rule "pickup window set per pharmacy".	Resolved by owner: per-pharmacy window + daily reminders (BR-097/098).
QR-2	Conflicts	Original brief: "web application" vs later "make it an app".	Resolved: Web + PWA now; native app in Phase 2.
QR-3	Conflicts	In the first (abandoned) interview round, video consultation was chosen for MVP; in the restarted round, video was deferred.	Latest answer prevails: video = Phase 2.

#	Check	Finding	Resolution
QR-4	Conflicts	Payment verification was first "deferred", then decided in the restart as reference number + manual confirmation.	Latest answer prevails.
QR-5	Missing rules	Payment-confirmation window length, pickup-expiry refund, pharmacy post-payment stock-out are undefined.	Listed below (Q-03, Q-04, Q-09).
QR-6	Undefined permissions	Clinic Manager dual role; pharmacy multi-user; Admin access to medical content for disputes.	Q-10, Q-15, Q-16.
QR-7	Incomplete flows	Disputes (patient says they paid, clinic says no) have no resolution path beyond one correction.	Q-08.
QR-8	MVP consistency	All MVP features trace to confirmed answers; F-17 automated enforcement is Should Have (manual fallback).	OK
QR-9	Unnecessary complexity	Split orders across pharmacies add complexity; confirmed by owner, kept. Ratings removed.	Consider simplifying if timeline slips.
QR-10	Assumptions	All [A] items must be validated; key ones listed below.	—

26.2 Unresolved questions

ID	Question	Owner	Blocks
Q-01	Final product name (current working name: التِيَام / Iltiam).	Product owner	Branding
Q-02	Exact subscription start: when does the free trial begin (approval date?)	Product owner	F-17
Q-03	Payment-confirmation window: how long does a slot/order stay held awaiting the provider's confirmation, and is there escalation if the provider never responds?	Product owner	F-06, F-09, F-13
Q-04	When a paid pharmacy order expires uncollected, is the patient refunded (fully/partially) or not?	Product owner	F-14
Q-05	Free-trial length.	Product owner	F-17
Q-06	Subscription prices (same for clinics and pharmacies? per doctor?).	Product owner	F-17
Q-07	Can a doctor offer booked live chat for free, or is it always paid?	Product owner	F-06
Q-08	Dispute and refund enforcement: what happens if a clinic/pharmacy doesn't refund or a payment is disputed? Admin role?	Product owner	F-09, F-15
Q-09	Pharmacy discovers stock-out after payment: policy and consequences?	Product owner	F-13
Q-10	Can Admins access medical content (e.g., for abuse reports or disputes)?	Product owner / Legal	SEC
Q-11	Medical-record retention period and deletion rules.	Legal	SEC-11
Q-12	Booking reminder timing (e.g., 24h and 1h before).	Product owner	F-16
Q-13	3-month success targets (clinics, pharmacies, patients, conversions).	Product owner	§22
Q-14	Regulatory requirements for telemedicine, e-prescriptions, and prescription-only medicines in Gaza.	Legal	Launch
Q-15	Can a Clinic Manager also be a doctor in the same account?	Product owner	F-01
Q-16	Do pharmacies need multiple staff logins?	Product owner	F-02
Q-17	Ratings & reviews: confirm deferral to Phase 2 (owner was undecided).	Product owner	§24

ID	Question	Owner	Blocks
Q-18	Minimum booking notice (how soon before a slot can it be booked?).	Product owner	F-08
Q-19	Can the same prescription be ordered more than once (refills)? Prescription validity period?	Product owner / Legal	F-10, F-12
Q-20	Who compiles the initial dermatology catalog and areas list?	Product owner	Launch

26.3 Key assumptions to validate

Highest impact first: BR-024 (email verification), BR-025 (phone collected), BR-047 (photo limits), BR-056 (live chat always paid), BR-134 (48h outdated flag), BR-077 (ILS currency), FR-051 (one correction), FR-087 (72h refund overdue), FR-099 (Admin no medical access), NFR-003 (performance budget), NFR-013 (tech stack).

---

27. Recommended Development Phases

Phase	Name	Scope	Exit criteria
0	Foundations & validation	Resolve Q-03, Q-04, Q-05/06, Q-14; compile catalog & areas list; confirm wallet process with 2–3 pilot partners	Legal go-ahead; catalog v1 ready
1	Partner onboarding	F-01, F-02, F-11, F-18 (verification + catalog), Arabic RTL PWA shell	Pilot clinics/pharmacies approved and configured
2	Consultations	F-03, F-04, F-05, F-06, F-07, F-08, F-09 (clinic side), F-16	Patients complete async, live, and in-person flows end-to-end
3	Prescription → Saydaliyati	F-10, F-12, F-13, F-09 (pharmacy side), F-14	Full journey UF-1 passes in pilot
4	Policies & business model	F-15, F-17, analytics (§21)	Refund & subscription flows live; KPIs reporting
5	Closed pilot	Limited clinics/pharmacies/patients in Gaza; fix based on feedback	KPIs measured against targets (Q-13)
6	Phase 2 features	§24 Phase 2 items	—

End of document.
